

# LUZ LUGO

## Email Developer

With 3+ years as email-specific developer and designer.

I'm skilled in HTML, CSS, and JavaScript and vanilla PHP as well as design tools like Photoshop, Illustrator, Dreamweaver, and Figma. I have expertise in platforms such as Mailchimp, emBlue, Iterable, Braze, Salesforce, Luminate, and Ascend, along with knowledge in responsive design, MSO, and UX/UI. As a self-taught professional chess player from the age of 12, I won national and international championships, which led to a scholarship to study my graphic design degree at the university.
